How to teach genealogy to kids? Consider creating fun and interesting timelines for them. Here are some tips and suggestions below. For more tips on how to build a genealogy timeline, here's a timely article entitled **Genealogy Timeline: How it Can Help Your Research** to explore at <https://www.familytreeresources.com/genealogy-timeline.html>. Below is an outline to tease you to consider in using the timeline concept.

1. Important dates in your life or your ancestor's life!
2. Discover interesting facts and events that happened during your own lifetime or in an ancestor's lifetime.
3. Visit and learn about the places where you and your ancestors lived.
4. Create a timeline either for you or an ancestor.

What is a family tree activity? Consider making one because its linear display can motivate one to illustrate your ancestry to others because filling in the missing gaps can be very intriguing to others including youth.

A family tree is a genealogical chart documenting a person's ancestry. The diagram represents generations of family members and their relationships to one another. Making a family tree has several benefits for kids. It can help them build a core identity, develop an interest in history, and bond with relatives. Most of us tend to relate to family history charts with its outline, linear capabilities more naturally than to text-oriented documentations.

Below are more ideas to peruse for establishing joint family history activities for your entire family.
