- Wiki with clinic syllabus as "Virtual Panorama Photography": <http://wiki.familysearch.org>

Clinic Synopsis:

Photo imaging/Virtual Panorama technology can create CD-slideshows and post interactive photos with web site GPS accuracy, showing locations for photos taken with pertinent notes. When digital photos are combined with time-synchronized GPS tracks, photos can be linked with Google Earth Maps and cemeteries, for powerful family history web-presence displays.

Genealogy as an integrated family activity with multipoint Internet connectivity with interactive web-based applications will be demonstrated with 360 degree virtual panorama and photo-imaging technology "live" over the Internet from Ljubljana, Slovenia, Wisconsin and Utah for attracting strangers via Google searches to directly contact me for family history inquiries.

For an overview of how I have expanded my genealogical research with this web-based collaboration go to www.kuzmich.com/overview.html.

Clinicians:

Dr. John Kuzmich Jr. is a veteran music educator, jazz educator and music technologist of 40+ years, 500+ published articles and 5 textbooks.

Ivan Majc is a veteran of 360 degree virtual panorama photographer for commercial and genealogical services
