

The Best of Artificial Intelligence: It Gets Better On a Regular Basis Now!

Artificial Intelligence (AI) is the pursuit of building machines with specialized software that can perform tasks typically requiring human intelligence—such as reasoning, learning, perception, and language understanding. Its history spans ancient imagination to modern deep learning breakthroughs. Its popularity has been surging much in today's news. Artificial Intelligence (AI) has evolved rapidly, offering powerful tools to enhance everything from creativity and productivity to communication and entertainment. Whether you're looking for AI-powered assistance in writing, design, video editing, or problem-solving, there's an AI app or website tailored for your needs. Here's an informative post entitled **Top 10 Best AI Apps & Websites in 2026: Free and Paid** at

<https://www.top10.com/best-lists/best-ai-apps>

• Symbols & Shapes

I prefer to use ChatGPT but you should try them all to see what what's best for your situation. *Google's Notebook LM* is a sure winner for drafting one's life story with fantastic editorial capabilities that even my wife who is a professional editor couldn't believe. The product was previously featured in this group's February 17th posting entitled: **AI Voice Recognition Assistance for Genealogy and Going Far Beyond.**

To view nearly all of the 1000+ posts in this "how to" and step-by-step Facebook group for a user-friendly Table of Contents even if your colleagues don't have a Facebook account at

<https://foothills-family-history.org/>

or

<https://foothills-family-history.org/alphabetical-view>.

There, you can view, print and/or save the posts with no hassles.
