

Never Underestimate the Power of AI: because you can be fooled, mislead and/or blessed with its creativity which is the very nature of AI.

In genealogical endeavors, its impact is growing constantly as the RootsTech 2026 Conference will attest at <https://www.rootstech.org>.

No matter how difficult things ever get, here is a must-see YouTube video that I highly recommend that you view and appreciate its intended message at https://www.youtube.com/watch?v=ZQW_zBXBnrw&list=RDhnsEwW0XTc&index=21. Duration is 8:30 minutes. Don't miss the vocal solo after the heart-warming speech. We live in a new world in which AI has many capabilities if used correctly. I'm excited that my grandson, Elder Teancum Kuzmich, will have a positive impact with this new technology tool in his AI career that will resume after his Spanish-speaking mission in the Omaha, Nebraska Mission in 2027. Being of the "Ancient" generation, I am very fortunate that I have any usable technology skills in my latter-years. Somehow, I got into it without formal training into web designing, social media and even taught technology at the middle and high school levels. And now, I await our future family generations to embrace it even further, especially since genealogy is so positively being affected now!

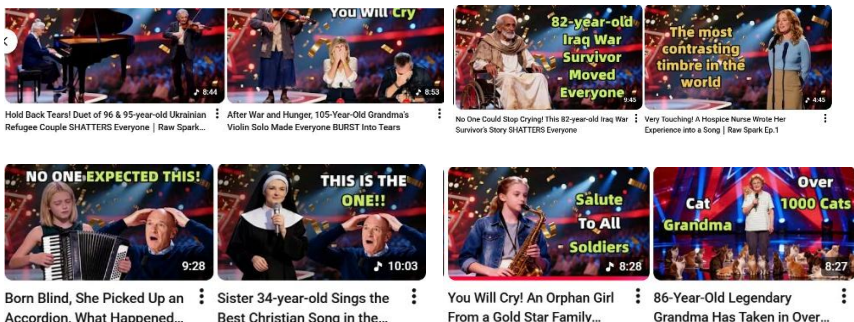

This video cited above is from **Raw Spark**, the world's first talent show produced using AI technology! The characters and story are fictional creations. We hope that through these fictional stories, you can experience the beauty of human connection in a world full of serious political, social, religious and economic disarray.

Hope this posting helps to brighten up your life's challenges. Life is definitely full of ups and downs which is part of the Lord's Gospel plan of agency by the atonement of Jesus Christ. Although my days are probably numbered when compared to yours since I'm already in my 80's, it is so nice to share this AI inspirational finding with you. My text messaging skills are terrible so please accept my email connectivity since everybody is fluent in text messaging in my extended family while I struggle at best and rarely connect and share content with them in this format. Perhaps someday, AI will summarize my lengthy emails to much shorter messages!

Conclusions:

The Raw Spark Show at <https://www.youtube.com/@watchrawspark> currently has 51 similar heart-touching videos covering a myriad of topics with 39.7 K subscribers. And you will not be disappointed.

This post can be viewed better formatting and links that work at <https://www.kuzmich.com/Facebook/AI.pdf>

If you desire quick access to my previous 1,000+ posts in this temple and family history group, go to:
<https://foothills-family-history.org/> as the alphabetic table of contents has all the posts conveniently organized by subject topics as part of three pages of posts to peruse. Later this week, I will update this T of C covering the last month's most recent entries so you can take advantage of these "how to", step-by-step guidelines for
